

Design and manufacture of trailed and motorised support units for the emergency services

Cost-effective versatility, practicality and reliability with full back-up service across the range

- Bespoke design
- Full graphics service
- Standard units equipped to order
- Quality components

MLU - SPB35
Mobile Lifeguard Unit
3.5 Metre

270° Panoramic view

Easy access and egress
All the equipment for an essential Lifeguard service

High profile service
Secure whilst off duty

Marco and the Royal National Lifeboat Institute

Background

The RNLI currently provides fully trained volunteer lifeguards to patrol over 110 beaches around Great Britain. As family holidays at home remain popular, that number is set to double in the next few years.

Already familiar with Marco's innovative response to a brief, the RNLI's requirement was for a mobile operational station for individual lifeguards on the beach, with 270° surveillance and full weather protection. Each station had to be towable onto public roads for storage at the end of each season, manoeuvrable on mixed terrain, but fully stable under all conditions when in use. Inside there was to be a hot water facility, wetsuit drying, personnel lockers and radio communications. There would need to be an independent power supply, plus full unit security when empty.

Designing and building a trailer that wasn't a trailer for up to 14 weeks of the year to encompass all the demands of the brief was a unique challenge, met with relish. Within 8 weeks of the original consultation, a ground-breaking prototype had been tested and an initial 17 units were ordered for delivery during 2008. 17 more units were ordered and delivered in 2009 with a further 10 scheduled for roll out in 2010.

On Show

Marco X35 SPB MLU Mobile Lifeguard Station for the RNLI

Features:

- Digitally printed graphics
- Panoramic outlook
- Flagpoles
- Integral decking to 2 sides
- Solar power provision
- Hot water supply
- Radio communication console
- Security shutters
- Specially designed removable drawbar
- Multi-terrain wheels & tyres

Innovation, attention to detail and dependability are Marco hallmarks in providing solutions for special assignments. We welcome your enquiries.

Statement

Quality and value have been Marco Trailers' guiding principles in the manufacture of Special Purpose Bodies for 45 years. By using the best materials and high standards of workmanship, the life expectancy of a Marco product is in excess of 15 years, with low maintenance.
