

Design and manufacture of trailed and motorised exhibition, hospitality and special purpose units

Cost-effective versatility, practicality and reliability with full back-up service across the range

- Bespoke design • Standard units equipped to order • Full CAD and Signwriting service
- Management and logistics specialists • One stop marketing solutions • Hire units available

X70 SOS Trailer - Thanet District Council

7m SOS Trailer featuring four rooms for a joint partnership between: Thanet District Council, Kent Police, Kent Fire & Rescue Service and the NHS. The unit incorporates: Interview room, Treatment room, Counselling room and Information area

Marco and the Thanet District Council Partnership

Background

Reacting to an enquiry from Thanet District Council, Marco were asked to provide a design that could provide the Safer Communities project with a mobile outreach centre for the night time community.

The Safer Communities Partnership involves The Emergency Services and Local Authorities working together to provide essential services and information. Our design provides each service in four distinct and separate rooms as can be seen.

Information area and counselling room

The information area features a comfortable wipe clean upholstered seat, 42" LCD TV with DVD player and 2.1 sound system, lined walls to accept velcro fixed graphics and 8 wall mounted leaflet dispensers. The counselling room is secured with a PIN numbered lock and also features upholstered seating and a full height storage cupboard.

Entrance

Aluminium entrance steps with hand rails and a portable access ramp lead up to the fully glazed (toughened) UPVC french doors. The entrance takes you to the information area and hall way leading to the counselling room, treatment room and interview room.

Treatment Room

This room is lined in wipe clean scratch resistant composite laminate and trimmed. It features a treatment couch, wall mounted storage system with fitted locking cupboard and drawer, work surface with sink and mixer tap with instant hot water delivery system.

Interview Room

Features lined walls to accept velcro fixed graphics and an interview table with two to four chairs as required.

Statement

Quality and value have been Marco Trailers' guiding principles in the manufacture of Special Purpose Bodies for 45 years. By using the best materials and high standards of workmanship, the life expectancy of a Marco product is in excess of 15 years, with low maintenance.
